I LOVE the idea of being with the "bad guys", that is when you find out how unfair guns are!

I like how the navigation works and how strategic you have to be to coordinate your horde.

Man I had some real fun last night and I can't wait for the final release!!

Cheers!

. Ehhhh... It's okay. It's nice to experience all of it once but after that, on new playthroughs I do one, two, maybe three of the quests and ignore the rest. The rewards range from not bad to practically nothing and requires extremely precise play to not exceed the absurdly low level requirements. You will essentially be doing only this questline for the entire first part of the game to not go over that cap, and doing this questline will almost surely lock you out of doing either of the side-routes in Dutch Gambit since those also have a low level requirement.

The "Final Lesson" is basically to suck it, you choose between a poor reward or a ludicrously hard battle that I used to think was unwinnable until I finally beat it after who knows how many tries. The full reward for winning the final lesson isn't even very good either, though its all right considering its the early game. Not worth it in my opinion, which speaks for both the final battle and the DLC as a whole.. I prefer recollection over this. The online is a bit bugged but if you can get past that, this is a great revamped SHMUP for those of you with masochistic intents of death at heart (=). Really good off-road racing game. Feels kinda like something between original Codemasters' Insane and Motorstorm. Tuning is fun with visible changes on cars with every tier of upgrades. Physics is decent overall, but have problems with quite often barrel rolls for some cars and you don't really feel the mass of heavier vehicles. There's occasional problems with AI too, with cars crashing at everything during races. Despite that flaws, it's really fun racing experience.. Not exactly sure what I played, but Spaghet does deliver in it's intensity and horror -- albeit temporarily. Will give a thumbs up even though some might consider Steam shovelware, this is the kinda I seek out on a daily basis.

[7/10 would dance to tuba & accordian again](#)

[*played on Rift + Touch *](#) my only complaint is that the FOV is too close so you can't really get a good view of what you're supposed to be playing. it also needs more songs. and it needs an option to play only the instrument you want versus the default of playing different ones . Pack does not download.. One of the packs I was hyped for and. did it deliver?...Sorta. Ninja is meant for stealth but also means fast killing so. let's go to the points:

[Crossbows: You get a new arrow type. dipped in poison. less damage. meant for stealth. can be useful for loud. hardly used.](#)

[Pistol Crossbow: A secondary. it's the first proper ninja weapon. Range sucks however but, it's totally perfect for stealth. Loud can be fun with too. if you use the explosive bolts.](#)

[Kross Vertex: before Rebalance. this thing was a real demon. even current rebalance somewhat hits very well. Fast and decent damage. Reloads fairly quick too. But concealment is. not very good. 21 at best. Shame.](#)

[Now. one of the main gun. the Lebensauger. number 1 of Mr. 47's assassnation weapon. based on teh WA 2000. It's the first semi auto sniper in the game. But the reload is extraordinary slow. Like. VERY SLOW. But same same as the lever action sniper and rattlesnake so. it's quite good. And it's. surprisingly. very concealable. Not on the 20's but. for a sniper. it's very doable.](#)

[Last. you get shurikens. before ace of spades cards were added. shuriekns were the first stealth throwable. good for shadow raid or stealthing. when molotovs or nades/dynamites got in the way to ruin it. Ofcourse you can still break windows and get spotted. These shurikens have also been dipped in poison. and deals about 100 damage. and hitting in teh head. can prove fatal. depending of difficulty. At least you get to see special to puke aswell.](#)

[Overall: it's a pack that was supposed to be for stealth. but they all can be served for loud too. They're fun to use so. it's one I can recommend at full price. But get it discounted too. which is even better.. Huge fan of Shooters and Star Shredders have alot of potential. I really like the retro feel of the game reminds me of the Sega saturn. Dream cast and playstation one era. For the price of the game I think its definitely worth recommending despite the noticeable bugs I feel once it will be worth it once some](#)

general work is done. The biggest issues I have noticed is that when you play using a controller, you have a tendency to try to move diagonally since the level is viewed from an angle. this has caused me to accidentally move the wrong way a few times. You still only move the joystick up down left or right. even though your block ends up moving diagonally. Other than that the music is great and the game is a lot of fun.

DONT DO IT!!!!!! I took a chance with this one, wasn't sure what it is, exactly, I'm still not sure, but the design is different from many other games, it's a strange world. It's a cool shooter for sure, the weapons are easy to use, no need for a tutorial here. Search for the keys and kill what ever jump in front of you. I wanted to help the developer, that seems to be working very hard to make the game better with every new version. Curious to try the next version.. Another fun, lane-based, couch co-op experience. My 4-year-old and I had a great time playing. Expect to farm levels to gain gold and experience before advancing to some of the harder levels. At times it can seem a little too repetitive and cumbersome, but it is still an enjoyable game.. I'd recommend this to people that enjoy playing characters that they are a big fan of that also don't premiere in games such as this. In my opinion, I like Thanos, so this DLC obviously gives me a chance to play as him. At the same time, it is also a waste of money and should have went free. I've been an RPG fan for a long time, but always had trouble getting into CRPG games (Neverwinter Nights, BG1V2, etc.). Then I played Pathfinder Kingmaker and that all changed. The story is dynamic, the gameplay is fun and diverse, and the characters are well-written. I've never played tabletop Pathfinder (or D&D for that matter), but the rules were easy enough to pick up on. The community is great too, with lots of helpful folks on both the steam forums and reddit. The last act of the game is a bit of a chore, but I enjoyed it nonetheless. Can't recommend this game enough!. I've never been into Tower Defense like games, but this one looked interesting and I don't regret buying it, great and addictive gameplay. Great game made by some friends of mine. Graphics are really well done and the atmosphere is really spooky and scary. Would recommend this for a challenge or if you love puzzles!. its ok i guess. i love how you can have pets makes game even more fun

each pet dose diffrent task

so it helps out. I'll admit this one's a bit of a challenge to drive, but you'll get used to it after some practice in Quick Drive. People gripe about the chuffing sounds. Me: it passes well enough for me. People complain about the lamps. Me: nowhere was it ever said in the advertisements or the manual that you could change the lamps. Also this is an old model with a facelift, before someone thought about making changeable lamps. If it's not advertised, why be disappointed? Personally I think I can find some use for this, especially the double-chimney version for services on the S&D. Does it have flaws? Yes. What dlc doesn't? Can it be enjoyable? Well, it is what you make of it.
